New Heavy-Duty 20' Flex-Wing

The FW4120 may be big, but it is no slumbering giant. Packed with upgraded, heavy-duty features that build on the legacy of the popular 2820 Series merged with the style of our 4115 and 5115 Series, these 20' Flex-Wings are perfectly at home in a variety of applications like mowing pastures, cleaning up row crop residue, taking down tough CRP, and long days maintaining roadsides. Designed to cut heavy grasses and brush up to 4" in diameter, these cutters get the job done in virtually any mowing environment, except small neighborhood yards with garden gnomes. It would destroy the gnomes.

The FW4120 can be equipped with Round Pans or a Shredder Bar, Perma-Level+ or 2 5/16" Ball Hitch, 540 or 1,000 PTO Driveline, Center Dual or Walking Tandem Axles, Wing Single, Dual, or Walking Tandem Axles, 21" or 25" Laminated, 27" or 29" Air-Filled, or 25" Foam-Filled Tires, and Single or Double Row Chains. And as with all Bush Hog® Rotary Cutters, the New FW4120 Flex-Wing comes with the industry's first 10-Year Gearbox Limited Warranty. To show our confidence in the durability of the New 41 Series Flex-Wings, we have increased the Machine Limited Warranty to 2 years.

FEATURES

4 custom-tuned rubber isolators on the center axle absorb damaging shock loads before going through the deck and eventually to the tractor

Each axle cuff houses a performance-matched rubber isolator to reduce shock from the moment it begins

Round Pan with Hardened Hex-Head Blade Bolts and Bushings make blade changes quick and easy

The SR1 model is equipped with two additional flat blades per cutting circle that can be fitted with an optional cross bar and two additional blades.
